

Feed Back

This is my revised web site. I did the first version with Corel and this one was done with Microsoft. It may not be as flashy as the first one but it will make it way less work for me to update and hopefully it is more functional. There should be less spelling mistakes and errors too I hope. I have no training in web design and learned it on the fly so it is what it is. If you have any comments or questions let me know.
