

Taster History

The Tequila taster idea started when Antonio and I went to a taster put on by Jose Cuervo in Vancouver. At that time we did enjoy tequila and drank our fair share but the taster opened our eyes and mouths to the world of fine tequilas. I thought that the taster pages were such a great idea that I made some for my Mexican restaurant. There were 2 of them and I had to redo them each once due to the BC government controlling which tequilas you could get. We then got the idea that we should have our own tasters. You may notice that when we started out we didn't include any of the tequilas that you could get in BC in our personal tasters as we wanted to try something different. We may have missed out rating them but we sure didn't miss out on tasting them.

Here are the Taster Pages from Jose Cuervo and Luna Loca.
