## Diving Howe Sound Reefs and Islands

**7:30 PM**

**Thursday, March 8, 2012**

**Unity Church - 5840 Oak St**

**Oak St at 42nd Ave, Vancouver – Rear entrance**

Join the father and daughter team of Glen and Kelsey for a talk on underwater discoveries in Howe Sound. Starting with an introduction on Glen's new book, *Diving Howe Sound Reefs and Islands*, the pair takes you through 30 years of diving in Howe Sound, and what previously undiscovered reefs hold in store for the adventurous. Learn more about making high resolution underwater 3D maps, details on glass sponge bioherms on deep sea mounts, and the techniques used to map and study them.

Marine Biology Section evening programs are held from January through April and September through November, on the second Thursday of the month. Programs are free, open to the public, and members are encouraged to invite their friends. For more information and suggestions for future programs, contact Joan Lopez at [joan.lopez@live.com](mailto:joan.lopez@live.com).
